Personal Candidate Statement

Of

Dr. Alda Moore

I want to serve on the ABPsi Board of Directors to work for ABPsi, to give back to an organization who gives so much, to reinforce the concept of Ubuntu, to put Umbuntu into practice, as Board member and ABPsi member, professional and person. I want to serve, to learn, to teach, to know. My skills and experiences include practice management, teaching, supervision, business management, consultant, clinical trainer, marketing, public relations, and organization. I can write well, I have good computer skills, I love to work hard, and I take orders well, and love to be a member part of groups. I have knowledge of the etiology of ABPsi, and I have additional knowledge as area chair for the Mid-Winter Conference in Little Rock, 2013. Our financial infrastructure needs close attention, with our marketing, management, and accounting practices to be congruent and focused on our financial infrastructure. As a person who is often viewed as visionary, I think ABPsi, will need to continue to look to the needs of the student aspiring professionals, the African American community and institutions, such as HBCU's, and spiritual guidance from our elders, both past and present to develop a strong financial infrastructure. ABPsi must begin a comprehensive marketing and development program, and possibly try new and innovative approaches. We must develop platforms and itineraries that motivate members and possible members. We must continue to seek acknowledgement in diverse ways. There are many crucial internal and external opportunities and challenges - perhaps survival should be a number one priority, but survival with vitality, energy and production. We must listen and learn the rhythm and the beat. We are blessed with this challenge and this opportunity.
